

Amazing Race Palestine

A physical and mental challenge: Race around the city solving clues and finding items competing against other teams. Traveling by foot, by car, by camel or even by bicycle. The team that solves the clues and finds the objects are then challenged to use these objects to problem solve a complex engineering task.

Objective: Work as a team to find and solve the clues as well as solve an engineering challenge.

Duration:

1 day (5 - 6 hours)

Benefits

- Bring people closer together
- Strategy Development
- A greater understanding of each others strengths and talents
- Collaborative Problem Solving
- Project Planning
- Time Management
- Communication Building
