

Computer Aided Manufacturing Open day

November 19th, 2012

From idea to high quality product through advanced manufacturing systems

This event is focusing on latest performances in the field of CAD-CAM, Machines and Cutting Tools. Another idea is to create links between complementary fields (education, CAD-CAM software, Machine tools and machining center, cutting tools etc) in order to help customers to increase the quality of their products.

The event will include the following presentations:

- Computer aided design
- Computer aided manufacturing
- NC – simulation
- Machines and advanced systems of manufacturing
- Cutting tools & cutting parameters
- Raw materials
- Quality control
- High productivity machining - *cutting demo*
- Round table and conclusions – MSP department

The event will take place in University POLITEHNICA from Bucharest, Faculty of Engineering and Management of the Technological Systems (IMST) amphitheater CD008
